Game Design Foundations, Second Edition covers how to design the game from the important opening sentence, the One Pager document, the Executive Summary and Game Proposal, the Character Document to the Game Design Document. The book describes game genres, where game ideas come from, game research, innovation in gaming, important gaming principles such as game mechanics, game balancing, AI, path finding and game tiers. The basics of programming, level designing, and film scripting are explained by example. Each chapter has exercises to hone in on the newly learned designer skills that will display your work as a game designer and your knowledge in the game industry."

Go on a 60-year ride with Harley-Davidson's Sportster Things got a little weird in the American motorcycle industry after World War II. People hungered for new motorcycles, buying just about everything manufacturers could build. But on rare occasions a manufacturer produced a machine that nobody wanted. Such was the case with the Harley-Davidson Model K. The Model K had most of the features buyers wanted in a modern machine, like hand-operated clutches, foot-operated shifters, and cool-running aluminum heads, but it lacked perhaps the most important technological upgrade: a modern overhead-valve valve-train design. The Model K retained the antiquated side-valve design because of arcane AMA racing rules written when Harley-Davidson and Indian competed head-to-head on American racetracks, but by 1952 Indian was on its last legs. This should have made the Model K a massive sales success. What nobody counted on was the British bike invasion. Thanks to their modern overhead-valve engines, the lightweight British bikes humiliated the side-valve Harleys on the track and on the street. Upgrades to the Model K didn't help. Harley finally relented and introduced a new overhead-valve middleweight for the 1957 model year. Dubbed the Sportster, it was everything the Model K was not. More importantly, it was faster than the British competition. Thus began the Sportster's sixty-year reign. Harley-Davidson Sportster: Sixty Years tells the complete Sportster story. Noted Sportster expert Allen Girdler covers all the bikes--the XLCH, Caf, Racer, XR1000, XLX, 883, Iron, Forty-Eight, Seventy-Two, and Nightster--that have made the Sportster one of the most iconic motorcycles on earth.

Connectivity, as well as conflict, characterizes Eurasia. This edited volume explores dynamic geopolitical and geo-economic links reconfiguring spaces from the eastern edge of Europe through the western edge of Asia, seeking explanation beyond description. The ancient Silk Road tied together space, much as pipelines, railroads, telecommunications infrastructure, and similar cultural and constructed links ease the mobility of people and products in modern Eurasia. This book considers Eurasia along an interlinked corridor, with chapters illustrating the connections as a discussion foundation focusing on the shared interactions of a set of nation states through time and across space, generating more positive considerations of the resurgently important region of Eurasia. China's interests fall into three chapters: the southeastern border with Vietnam, the southwestern Himalayan edge, and the western Muslim regions. Russia's recovery relates events to a larger landmass context and focuses on the importance of historic mobility. A geo-history of the Caspian considers this petroleum-rich area as a zone of cultural and economic interconnection. The final focus on Central Asia treats the traditional heart of "Eurasia". The concluding chapter pulls together strands linking subregions for a new concept of "Eurasia" as an area linked by vital interests and overlapping histories.
