At the end of an accounting period, a company ' s total assets equaled \$576,000, and liabilities equaled \$245,000. How much was the company ' s owners ' equity? The owners of a start ?up invest \$1,000,000 into the business. After one year of operations, the business has assets of \$850,000 and losses of \$300,000.

Closing the Books gives you a complete understanding of how information is summarized into the financial statements, as well as the closing steps needed to create financial statements. It shows how to fine-tune the closing process to achieve a shorter close, and describes the variety of financial statement formats that are available. It even addresses financial statement disclosures, the soft close, public company reporting, and the controls and record keeping needed for the closing process.

Earn College Credit with REA's Test Prep for CLEP® Financial Accounting Everything you need to pass the exam and get the college credits you deserve. CLEP® is the most popular credit-by-examination program in the country, accepted by more than 2,900 colleges and universities. For over 15 years, REA has helped students pass CLEP® exams and earn college credit while reducing their tuition costs. Our CLEP® test preps are perfect for adults returning to college (or attending for the first time), military service members, high-school graduates looking to earn college credit, or home-schooled students with knowledge that can translate into college credit. The CLEP® Financial Accounting test prep assesses the skills tested on the official CLEP® exam. Our comprehensive review chapters cover: accounting principles and ethics; forms of business and cycles; the income statement; the balance sheet; statement of cash flows; investments; contingent liabilities, and more. The book includes two full-length practice tests. Each exam comes with detailed feedback on every question. We don't just say which answers are right—we explain why the other answer choices are wrong—so you can identify your strengths and weaknesses while building your skills. REA is the acknowledged leader in CLEP® preparation, with the most extensive library of CLEP® titles available. Our test preps for CLEP® exams help you earn college credit, save on tuition, and get a college degree.

More students get accounting when using Weygandt's Financial Accounting, 9th Edition because of the unique Framework of Success created and refined by the authors based on years of teaching and course design experience. The Team for Success is focused on helping millennial students get the most out of their accounting courses in the digital age, and on helping instructors deliver the most effective courses whether face-to-face, hybrid, or online with model course plans designed for easy and effective implementation. Financial Accounting, 9th Edition by Weygandt, Kimmel, Kieso provides students with a clear and comprehensive introduction to financial accounting that begins with the building blocks of the accounting cycle. WileyPLUS sold separately from text.

The two main goals of this thesis are to provide an assessment tool for accounting professors as well as a learning tool for students to gain a better understanding of the accounting cycle. Many students coming out of the basic accounting courses have a pretty good understanding of the different parts of the accounting cycle, but few have a solid understanding of the bigger picture and how each part fits together. I believe this is partly due to the fact that students in 200 level courses are never required to complete the accounting cycle from beginning to end. As such, it is necessary for professors to assess the level of knowledge possessed by new students beginning a particular course. In my experience as a student, I have found that when an introductory assessment is given in order for the professor to reflect on the results of that assessment and makes changes to the course curriculum as necessary, the overall success of the students in that course is much higher than if the assessment had not been given. In order to test the knowledge retention of intermediate level accounting students, I have developed a case applicable to students who have completed the first intermediate financial accounting course and any of its prerequisites. My focus will be on the accounting cycle and issues involving financial accounting as opposed to managerial. I have provided a practice case including case requirements, blank forms and worksheets to be completed by the user, and a solution to the case.

In designing a successful English for Specific Purposes (ESP) course, an ESP lecturer must research the professional setting and in turn analyze, abstract and synthesize its linguistic characteristics. Expert vocabulary, typical syntactic structures, relevant morphological word formation processes, exemplary text organization and both written and spoken stylistics are no longer taught with little functional relevance, instead they are approached from a subject-specific perspective. While designing and/ or compiling teaching and learning material, an ESP lecturer must decide upon the appropriate teaching methodology and pedagogy in order to ensure that the course in its entirety simulates a particular professional situation. Only if the course is successful in this aim, will ESP learners be able to quickly engage in uninhibited communication and improve job performance in their field of work, whether that be in tourism or aviation. Although many professional settings share certain characteristics, they are nevertheless unique and often require different approaches. For this reason, there is little or no ready-made teaching material or methodological approaches when it comes to ESP teaching. A dedicated ESP lecturer caters for those idiosyncrasies doing a minute, multifaceted investigation into the linguistic characteristics of the relevant professional domain. Bringing together a collection of essays, this edited volume reveals the variety, depth, and quality of the ESP research and its convergence across different professional disciplines.

Is this the right book for me? Basic Accounting is a complete, step-by-step course in elementary accounting. Giving clear and concise explanations of accounting principles and practice including PAYE, cashflow statements, accounting for share capital, accounting standards and non-financial reporting, it is perfect for the newcomer to basic accounting, the first- level accounting student or anybody needing to brush up their accounting skills.
