Anatomy Lab Heart Dissection Name: _____ 2 laterally by the lungs, posteriorly by the vertebral column, and anteriorly by the sternum. The apex (lower point) of the heart extends slightly to the left of the body's midline and

Anatomy Lab Heart Dissection - astephenscience

Several vessels extend from the superior (topmost) side of the heart. It may be necessary to remove excessive tissue to visualize structures and for ease of dissection. Identify the aorta and the pulmonary artery and then cut them to make the valves visible (Figure 5.4). The aortic and pulmonary valves are each made up of three leaflets.

Chapter 5. Heart Dissection – Anatomy and Physiology 2 ...

of the human heart model. Then you will dissect the human heart by using your Anatomy & Physiology / Revealed, Version 2.0 CD to identify the major structures of the human heart and learn functions of each. BIOL 2402 Objectives After completing this lab, you should be able to: 1. Locate and identify the major structures of the sheep heart. 2.

Dissection of the Sheep Heart - HCC Learning Web

The heart dissection is probably one of the most difficult dissections you will do. Part of the reason it is so difficult to learn is that the heart is not perfectly symmetrical, but it is so close that it becomes difficult to discern which side you are looking at (dorsal, ventral, left or right). Finding the vessels is directly related to being able to orient the heart correctly and figuring out which side you are looking at.

Heart Dissection Walk Through - The Biology Corner

1. Place a heart in a dissecting pan & rinse off the excess preservative with tap water. Pat the heart dry. 2. Examine the heart and locate the thin membrane or pericardium that still covers the heart. The pericardium or pericardial sac, is a double-layered closed sac that surrounds the heart and anchors it. The pericardium

STUDENT LABORATORY Sheep Heart Dissection

Dissection (from Latin *dissecare* "to cut to pieces"; also called anatomization) is the dismembering of the body of a deceased animal or plant to study its anatomical structure. Autopsy is used in pathology and forensic medicine to determine the cause of death in humans. Less extensive dissection of plants and smaller animals preserved in a formaldehyde solution is typically carried out or ...
