After (attempting) City at the End of Time and after reading some of the reviews of a few of his books, I think maybe I just hadn't read enough to form a truly educated opinion, though. The story just seemed to go on-and-on-and-on. Had it been 1/2 or 2/3 as long, it might have been really good.

Multiple Hugo and Nebula award-winning author, Greg Bear is one of science fiction's most accomplished writers. Bold scientific speculation, riveting plots, and a fierce humanism reflected in characters who dare to dream of better worlds distinguish his work. Now Bear has written a mind-bendingly epic novel that may well be his masterpiece. Do you dream of a city at the end of time? In a time like the present, in a world that may or may not be our own, three young people—Ginny, Jack, and Daniel—dream of a doomed, decadent city of the distant future: the Kalpa. Ginny's and Jack's dreams overtake them without warning, leaving their bodies behind while carrying their consciousnesses forward, into the minds of two inhabitants of the Kalpa—a would-be warrior, Jebrassy, and an inquisitive explorer, Tiadba—who have been genetically retro-engineered to possess qualities of ancient humanity. As for Daniel: He dreams of an empty darkness—all that his future holds. But more than dreams link Ginny, Jack, and Daniel. They are fate-shifters, born with the ability to skip like stones across the surface of the fifth dimension, inhabiting alternate versions of themselves. And each guards an object whose origin and purpose are unknown: gnarled, stony artifacts called sum-runners that persist unchanged through all versions of time. Hunted by others with similar powers who seek the sum-runners on behalf of a terrifying, goddess-like entity known as the Chalk Princess, Ginny, Jack, and Daniel are drawn, despite themselves, into an all but hopeless mission to rescue the future—and complete the greatest achievement in human history.

Familiar to New Mexicans through the columns and articles he has written for various periodicals, Price presents his philosophy of what makes Albuquerque, New Mexico such an attractive place to live, and explains how to keep it that way. Annotation copyright Book News, Inc. Portland, Or.
The pleasant little American city of Middletown is the first target in an atomic war - but instead of blowing Middletown to smithereens, the super-hydrogen bomb blows it right off the map - to somewhere else! First there is the new thin coldness of the air, the blazing corona and dullness of the sun, the visibility of the stars in high daylight. Then comes the inhabitant's terrifying discovery that Middletown is a twentieth-century oasis of paved streets and houses in a desolate brown world without trees, without water, apparently without life, in the unimaginably far-distant future.
Updated more than ten years after its initial publication, this impassioned book is more relevant than ever to Albuquerque's future. Illuminating, provocative. . . . a complex, intelligent study of urbanization through an intimate examination of Albuquerque. . . . an insightful, absorbing book.--El Palacio
From nineteenth-century paintings of fires raging through New York City to scenes of Manhattan engulfed by a gigantic wave in the 1998 movie Deep Impact, images of the city's end have been prolific and diverse. Why have Americans repeatedly imagined New York's destruction? What do the fantasies of annihilation played out in virtually every form of literature and art mean? This book is the first to investigate two centuries of imagined cataclysms visited upon New York, and to provide a critical historical perspective to our understanding of the events of September 11, 2001. Max Page examines the destruction fantasies created by American writers and imagemakers at various stages of New York's development. Seen in every medium from newspapers and films to novels, paintings, and computer software, such images, though disturbing, have been continuously popular. Page demonstrates with vivid examples and illustrations how each era's destruction genre has reflected the city's economic, political, racial, or physical tensions, and he also shows how the images have become forces in their own right, shaping Americans' perceptions of New York and of cities in general.

Written by Leung Ping-kwan in the 1980s and 1990s, this volume of poetry evokes the complexity of Hong Kong city life in the critical moments preceding the 1997 handover. The poet muses upon the problems of cultural identity and the passing of time, and explores the relationship between poetry and other genres and media within a cross-cultural and cross-border context. An introduction by Ackbar Abbas in the original edition relates Leung's writing to the cultural and political space of Hong Kong in the 1990s. This expanded bilingual version adds a new essay by Esther Cheung, and also a recent conversation between Leung and three critics, which provides insights on how Leung's poetry still resonates powerfully after two decades. The book invites readers to look afresh at Leung's meditative poetry and probe into the contradictory realities of this changing postcolonial city.

In this series Kay Kenyon has created her most vivid and compelling society yet, the universe Entire. Reviewers have called this "a grand world," "an enormous stage," and "a bravura concept." On this stage unfolds a mighty struggle for dominance between two universes. Titus Quinn has forged an unstable peace with the Tarig lords. The ruinous capability of the nanotech surge weapon he possesses ensures détente. But it is a sham. In what the godwoman Zhiya calls "a fit of moral goodness," he's thrown the weapon into the space-folding waters of the Nigh. This clears the way for an enemy he could have never foreseen: the people of the Rose. A small cadre led by Helice Maki is determined to take the Entire for itself and leave the earth in ruins. The transform of earth will begin deep in a western desert and will sweep over the lives of ordinary people, entangling Quinn's sister-in-law Cailiin in a deepening and ultimate conspiracy. In the Entire, Quinn stalks Helice in the fabled Rim City, encircling the heart of the Entire. Here he at last finds his daughter, now called Sen Ni, in the Chalin style. Outside of earth-based time, she has grown to adulthood. He hardly knows her, and finds her the mistress of a remarkable dream-time insurgency against the Tarig lords—and more, a woman risen high in the Entire's meritocracy. Quinn needs his daughter's help against the woman who would destroy the earth. But Sen Ni has her own plans and allies, among them a boy-navitar unlike any other pilot of the River Nigh—a navitar willing and supremely able to break his vows and bend the world. Quinn casts his fate with the beautiful and resourceful Ji Anzi who'sent on a journey to other realms—holds the key to Quinn's heart and his overarching mission. But as he approaches the innermost sanctuary of the Tarig, he is alone. Waiting for him are powerful adversaries, including a lady who both hates and loves him, the high prefect of the dragon court, and Quinn's most implacable enemy, a warrior whose chaotic mind will soon be roused from an eternal slumber. From the Trade Paperback edition.

In the beginning, there is nothing. In the end, the same. This is a place. It is in the middle, and that's all. Ben Moor is haunted by a villainous alter ego. Since his father's death shortly after the fall of the twin towers, the boy believes he is impervious to any physical and emotional pain. Struggling with his father's absence and looming adulthood, Ben rejects his obsessions with comic books, video games, sports, and dreams of super heroism. He feels isolated even among those closest to him: his little brother, Bobby Jihad, and an artistic, bass-playing girl named Kitty. After killing his partner, the assassin runs from once-trusted colleagues and the boy who stalks him in dreams. Both killer and boy find their confidence challenged as they wander among the ruins of buildings and lives transformed by hostility and violence. Aware of each other and trying to make sense of the tragedies in their separate lives, they navigate the memories of the living and dead, cope with the burden of survival, and hope for redemption at The End of the City.

In the wake of the tragedy and destruction that came with Hurricane Katrina in 2005, public schools in New Orleans became part of an almost unthinkable experiment—eliminating the traditional public education system and completely replacing it with charter schools and school choice. Fifteen years later, the results have been remarkable, and the complex lessons learned should alter the way we think about American education. New Orleans became the first US city ever to adopt a school system based on the principles of markets and economics. When the state took over all of the city's public schools, it turned them over to non-profit charter school managers accountable under performance-based contracts. Students were no longer obligated to attend a specific school based upon their address, allowing families to act like consumers and choose schools in any neighborhood. The teacher union contract, tenure, and certification rules were eliminated, giving schools autonomy and control to hire and fire as they pleased. In Charter School City, Douglas N. Harris provides an inside look at how and why these reform decisions were made and offers many surprising findings from one of the most extensive and rigorous evaluations of a district school reform ever conducted. Through close examination of the results, Harris finds that this unprecedented experiment was a noteworthy success on almost every measurable student outcome. But, as Harris shows, New Orleans was uniquely situated for these reforms to work well and that this market-based reform still required some specific and active roles for government. Letting free markets rule on their own without government involvement will not generate the kinds of changes their advocates suggest. Combining the evidence from New Orleans with that from other cities, Harris draws out the broader lessons of this unprecedented reform effort. At a time when charter school debates are more based on ideology than data, this book is a powerful, evidence-based, and in-depth look at how we can rethink the roles for governments, markets, and nonprofit organizations in education to ensure that America's schools fulfill their potential for all students.

Tokyo, 1985. The world's first megacity is at the height of its dynamism. Forty years ago, a frenzy of creativity galvanised the Japanese capital. From fashion to movies to electronics, Tokyo was forging the future. Factories run by robots, the world's first high-speed trains, apartment blocks built from shipping containers, love hotels modelled on Bavarian castles... In the thick of it, a young British teacher gazed around and asked questions. Why are Tokyoites so phlegmatic about earthquakes? What makes this high-tech city so unmistakably Japanese? And how, despite its size and pace, has Tokyo retained many pockets of perfect calm? First published in 1985, Tokyo: the City at the End of the World was quickly recognised, in Time magazine, The New Yorker and elsewhere, as a fascinating portrait of the city that pointed where the world was headed. Forty years on numerous Asian cities have taken up Tokyo's baton, but Peter Popham's depiction of its menace and charm remains unrivalled.
