Media is rapidly evolving, from social media to news channels, individuals are being bombarded with headlines, new technologies, and varying opinions. Teaching the next generation of communication professionals how to interact with varying forms of media is paramount as they will be the future distributors of news and information. The Handbook of Research on Media Literacy in Higher Education Environments provides emerging research on the role of journalism and mass communication education in the digital era. While highlighting topics such as community media labs, political cognition, and public engagement, this publication explores the impact of globalization and a changing and diversified world within the realm of higher education. This publication is an important resource for educators, academicians, professionals, and researchers seeking current research on applications and strategies in promoting media and digital studies in higher education.

Philosophers have warned of the perils of a life spent without reflection, but what constitutes reflective inquiry - and why it's necessary in our lives - can be an elusive concept. Synthesizing ideas from minds as diverse as John Dewey and Paulo Freire, the Handbook of Reflection and Reflective Inquiry presents reflective thought in its most vital aspects, not as a fanciful or nostalgic exercise, but as a powerful means of seeing familiar events anew, encouraging critical thinking and crucial insight, teaching and learning. In its opening pages, two seasoned educators, Maxine Greene and Lee Shulman, discuss reflective inquiry as a form of active attention (Thoreau's "wide-awakeness"), an act of consciousness, and a process by which people can understand themselves, their work (particularly in the form of life projects), and others. Building on this foundation, the Handbook analyzes through the work of 40 internationally oriented authors: - Definitional issues concerning reflection, what it is and is not: - Worldwide social and moral conditions contributing to the growing interest in reflective inquiry in professional education: - Reflection as promoted across professional educational domains, including K-12 education, teacher education, occupational therapy, and the law: - Methods of facilitating and scaffolding reflective engagement: - Current pedagogical and research practices in reflection: - Approaches to assessing reflective inquiry. Educators across the professions as well as adult educators, counselors and psychologists, and curriculum developers concerned with adult learning will find the Handbook of Reflection and Reflective Inquiry an invaluable teaching tool for challenging times.
