A compulsively readable psychological thriller set in New York and at Oxford University in which a group of six students play an elaborate game of dares and consequences with tragic result It was only ever meant to be a game played by six best friends in their first year at Oxford University; a game of consequences, silly forfeits, and childish dares. But then the game changed: The stakes grew higher and the dares more personal and more humiliating, finally evolving into a vicious struggle with unpredictable and tragic results. Now, fourteen years later, the remaining players must meet again for the final round. Who knows better than your best friends what would break you? A gripping psychological thriller partly inspired by the author's own time at Oxford University, Black Chalk is perfect for fans of the high tension and expert pacing of The Secret History and The Bellwether Revivals. Christopher J. Yates' background in puzzle writing and setting can clearly be seen in the plotting of this clever, tricky book that will keep you guessing to the very end.

Includes directions for making a variety of cards for all occasions.

This is the only comprehensive guide to mapping software that clearly explains how to interface your GPS receiver with your computer to create maps, annotate aerial photos, and even create 3-D maps. Readers will discover how to make maps for free, download aerial photos, create and customize their own maps, use hidden tips and tricks, reduce the learning curve and get mapping right away, locate trailheads using a real-time moving map on a laptop or PDA, and how to best transfer information between a GPS, computer, and electronic maps.

An Entertainment Weekly "Must Read" • One of the NPR Book Concierge's "Best Books of the Year" "Twisty and told from multiple perspectives, this meaty thriller races to a satisfying finish." —People magazine "The intensity of the storytelling is exhilarating and unsettling." —Booklist (starred review) Twenty-six years ago Hannah had her eye shot out. Now she wants justice. But is she blind to the truth? "Arresting...Twisting backward and forward in time, entering the minds of each character in turn, Yates examines both how they reached this point and what happens years later, when the past wreaks havoc on the present...[A] sophisticated...elegant narrative." —The New York Times "The plot is darkly, intricately layered, full of pitfalls and switchbacks, smart and funny and moving and merciless." —Tana French, New York Times bestselling author of In the Woods and The Trespasser "Dark, intense, and disturbing...Highly recommended." —Krysten Ritter, author of Bonfire "Two of life's delicious pleasures—gourmet delectations and a sinister, plot-twisty tale—come together in this intelligent thriller." —Oprah.com Christopher J. Yates's cult hit Black Chalk introduced that rare writerly talent: a literary writer who could write a plot with the intricacy of a brilliant mental puzzle, and with characters so absorbing that readers are immediately gripped. Yates's new book does not disappoint. Grist Mill Road is a dark, twisted, and expertly plotted Rashomon-style tale. The year is 1982; the setting, an Edenic hamlet some ninety miles north of New York City. There, among the craggy rock cliffs and glacial ponds of timeworn mountains, three friends—Patrick, Matthew, and Hannah—are bound together by a terrible and seemingly senseless crime. Twenty-six years later, in New York City, living lives their younger selves never could have predicted, the three meet again—with even more devastating results.

Scholarly study of Samuel continues to wrestle with how we interpret this pivotal text. Even such basic matters as the question of what kind of literature it is remain unresolved while older questions such as the nature of its text and sources are debated anew in the light of material from Qumran and of current approaches to Hebrew narrative. Recognizing the importance of questions such as these, David Firth explores and introduces fresh ways of reading Samuel as a unified and yet complex text, which displays high levels both of literary artistry and of theological commitment. Although some stories in the books of Samuel are well known, and in the case of David and Goliath even proverbial, much of the content of these books is strange to modern readers. It is a story about a woman wanting a child, for example, that relates the beginnings of monarchy within Israel. Even the question of the monarchy is problematic, for we are introduced to not one royal family but two-those of Saul and David. David is ultimately shown to be the king chosen by God, yet by the end of the book he is only just managing to hold on to the kingdom as it is nearly torn from him by rivalries within his family. These arresting stories are perplexing, for Samuel's writers seldom tell us how to read and interpret them. Firth presents these complex and fascinating stories as part of a bigger picture, enabling students to chart their way through the literary and historical issues of the Samuel narrative. Firth addresses issues of historicity, sources, date and authorship, as well as -- crucially -- appreciating the text as a literary whole.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J.
