It focusses on analysis, research and argument construction as the foundations for successful advocacy and provides students with a working guide to use alongside moot problems in five popular topic areas: criminal law, contract law, tort law, human rights and the law of equity. Through careful use of annotated examples generated by real students, and expert tips and advice from the authors, the book shows students how to individually analyse, research and construct arguments for various advocate positions, providing a practical and easy-to-follow overview of how to tackle a moot from analysing a problem initially, right up to beginning to advocate.
