The sixth edition of the foundational reference on cognitive neuroscience, with entirely new material that covers the latest research, experimental approaches, and measurement methodologies. Each edition of this classic reference has proved to be a benchmark in the developing field of cognitive neuroscience. The sixth edition of The Cognitive Neurosciences continues to chart new directions in the study of the biological underpinnings of complex cognition—the relationship between the structural and physiological mechanisms of the nervous system and the psychological reality of the mind. It offers entirely new material, reflecting recent advances in the field, covering the latest research, experimental approaches, and measurement methodologies. This sixth edition treats such foundational topics as memory, attention, and language, as well as other areas, including computational models of cognition, reward and decision making, social neuroscience, scientific ethics, and methods advances. Over the last twenty-five years, the cognitive neurosciences have seen the development of sophisticated tools and methods, including computational approaches that generate enormous data sets. This volume deploys these exciting new instruments but also emphasizes the value of theory, behavior, observation, and other time-tested scientific habits. Section editors Sarah-Jayne Blakemore and Ulman Lindenberger, Kalanit Grill-Spector and Maria Chait, Tomás Ryan and Charan Ranganath, Sabine Kastner and Steven Luck, Stanislas Dehaene and Josh McDermott, Rich Ivry and John Krakauer, Daphna Shohamy and Wolfram Schultz, Danielle Bassett and Nikolaus Kriegeskorte, Marina Bedny and Alfonso Caramazza, Liina Pykkänen and Karen Emmorey, Mauricio Delgado and Elizabeth Phelps, Anjan Chatterjee and Adina Roskies

An Enquiry into the Causes of the Late Increase of Robbers, and Related Writings provides critical unmodernized texts of Henry Fielding's legal and social pamphlets during the period 1749 to 1753, when Fielding served as magistrate for the City and Liberty of Westminster and County of Middlesex. The texts, for the first time, are fully annotated, and a lengthy introduction places them in their biographical and intellectual context, and provides a detailed account of their publication and reception. Five of the six pamphlets included in this volume clearly serve the interests of the Pelham Administration. There is, however, no evidence to show that Fielding wrote any of the pamphlets at the invitation or command of figures of power within the Pelham Administration; instead he appears simply to have seized those opportunities appropriate to his office to further government interests or, as with An Enquiry into the Causes of the Late Increase of Robbers (1751) and A Proposal for Making an Effectual Provision for the Poor (1753), offered his own solutions to problems which Parliament was currently debating.

The Western magical traditions are currently undergoing an international resurgence. In Stealing Fire from Heaven, Nevill Drury offers an overview of the modern occult revival and seeks to explain this growing interest in ancient magical belief systems. Gnosticism and the Hermetica, the medieval Kabbalah, Tarot and Alchemy, and more recently, Rosicrucianism and Freemasonry, collectively laid the basis for the modern magical revival, which first began to gather momentum in Europe at the end of the nineteenth century. Western magic has since become increasingly eclectic, drawing on such diverse sources as classical Greco-Roman mythology, Celtic cosmology, Kundalini yoga and Tantra, shamanism, chaos theory, and the various spiritual traditions associated in many different cultures with the Universal Goddess. Drury traces the rise of various forms of magical belief and practice, from the influential Hermetic Order of the Golden Dawn to the emergence of Wicca and Goddess worship as expressions of contemporary feminine spirituality. He also explores Chaos Magick and the occult practices of the so-called Left-Hand Path, as well as twenty-first-century magical forays into cyberspace. He believes that the rise of modern Western magic stems essentially from the quest for personal spiritual transformation and direct experience of the sacred—a quest which the trance occultist and visionary artist Austin Osman Spare once referred to as "stealing fire from heaven." Considered in this light, Drury argues, modern Western magic can be regarded as a form of alternative spirituality in which the practitioners seek direct engagement with the mythic realm.
