Here's the ultimate guide to being the best—and safest—driver possible. And an absolute must for everyone with a learner's permit. Former Top Gear Stig and professional driver Ben Collins shares expert skills culled from a twenty year career as one of the best drivers in the world, famous for racing in the Le Mans series and NASCAR, piloting the Batmobile, and dodging bullets with James Bond. Refined over thousands of hours of elite-level performance in the physics of driving, his philosophy results in greater control and safer, more efficient and fun driving for all skill levels.

A Newbery Honor WinnerA New York Times Bestseller This stunning fantasy inspired by Chinese folklore is a companion novel to Starry River of the Sky and the New York Times bestselling and National Book Award finalist When the Sea Turned to Silver In the valley of Fruitless mountain, a young girl named Minli lives in a ramshackle hut with her parents. In the evenings, her father regales her with old folktales of the Jade Dragon and the Old Man on the Moon, who knows the answers to all of life's questions. Inspired by these stories, Minli sets off on an extraordinary journey to find the Old Man on the Moon to ask him how she can change her family's fortune. She encounters an assorted cast of characters and magical creatures along the way, including a dragon who accompanies her on her quest for the ultimate answer. Grace Lin, author of the beloved Year of the Dog and Year of the Rat returns with a wondrous story of adventure, faith, and friendship. A fantasy crossed with Chinese folklore, Where the Mountain Meets the Moon is a timeless story reminiscent of The Wizard of Oz and Kelly Barnhill's The Girl Who Drank the Moon. Her beautiful illustrations, printed in full-color, accompany the text throughout.

Once again, she has created a charming, engaging book for young readers.

A new paperback edition of the first book by the bestselling author of *A History of the World in 6 Glasses*—the fascinating story of the telegraph, the world's first "Internet," which revolutionized the nineteenth century even more than the Internet has the twentieth and twenty first.

"Elementary Differential Equations integrates the underlying theory, the solution procedures, and the numerical/computational aspects of differential equations in a seamless way. For example, whenever a new type of problem is introduced (such as first-order equations, higher-order equations, systems of differential equations, etc.) the text begins with the basic existence-uniqueness theory. This provides the student the necessary framework to understand and solve differential equations. Theory is presented as simply as possible with an emphasis on how to use it."--Pub. desc.

This second edition of *Microeconomics* is filled with learning-by-doing problems that give students a chance to make economics their own. These fully worked-out problems provide a step-by-step road map to help students solve numerical problems. Each problem correlates to similar practice problems at the end of each chapter. In addition, the authors include many extensive real-world examples in the text. These examples are contemporary applications of the theory and are longer and more extensive to show the evolution of the example. Each chapter opens with an example to draw readers into the topic.

Using the unifying valuation framework based on the Law of One Price, *Corporate Finance, Fourth Canadian Edition*, blends coverage of time-tested principles and the latest advancements with the practical perspective of the financial manager. With this ideal melding of the core with modern topics, innovation with proven pedagogy, renowned researchers Berk, DeMarzo and Stangeland establish the new canon in finance. KEY TOPICS: The Corporation; Introduction to Financial Statement Analysis; Arbitrage and Financial Decision Making; The Time Value of Money; Interest Rates; Valuing Bonds; Valuing Stocks; Investment Decision Rules; Fundamentals of Capital Budgeting; Capital Markets and the Pricing of Risk; Optimal Portfolio Choice and the Capital Asset Pricing Model; Estimating the Cost of Capital; Investor Behaviour and Capital Market Efficiency; Financial Options; Option Valuation; Real Options; Capital Structure in a Perfect Market; Debt and Taxes; Financial Distress, Managerial Incentives, and Information; Payout Policy; Capital Budgeting and Valuation with Leverage; Valuation and Financial Modeling: A Case Study; The Mechanics of Raising Equity Capital; Debt Financing; Leasing; Working Capital Management; Short-Term Financial Planning; Mergers and Acquisitions; Corporate Governance; Risk Management; International Corporate Finance MARKET: Appropriate for Undergraduate Corporate Finance Courses.
