sector, which includes everything from solar power to smart meters and advanced power storage.

This handbook compares and contrasts two methods employed in price indexes to adjust for quality change: conventional quality adjustment methods and hedonic price indexes. The latter are often used in price indexes for information and communication technology (ICT) products in several OECD countries, as well as for measuring prices for some other goods and services, notably housing. The handbook aims to contribute to a better understanding of the merits and shortcomings of these methods, and to provide an analytic basis for choosing among them.
