Henri de-Toulouse-Lautrec brought to his art a zest for life as well as an impeccable style. It is an exciting discovery to find that Lautrec applies this same exuberance and meticulous technique to the art of cuisine--that he invented recipes and cooked new dishes as an artistic creation worthy of his serious attention. This volume is a collection of the recipes that Lautrec invented, or were garnered in his company from acquaintances of all classes of society. It has been illustrated with the menus that Lautrec himself designed and decorated, as well as with a rich abundance of other appropriate Lautrec paintings and drawings. The frontispiece is a portrait by Edouard Vuillard of Lautrec preparing one of his masterful dishes. The recipes are given here in their original form, retaining their color of thought and language. The only modifications are culinary notes that have been added to facilitate the work of modern cooks. Lautrec took great pride in his culinary ability, and if he felt it would not be appreciated, he would say that some people "are not worth of ring dove with olives, they will never have any and they will never know what it is." Lautrec planned meals carefully, made beautifully decorated menus, and was inspired by the dinners to draw more sketches of the dinners, and of the food. He also brought to cuisine, as to the rest of his life, a marvelous wit. Who

could forget the invitation to eat kangaroo, in honor of an animal that he had seen boxing at a circus (it was replaced at the last moment by an enormous sheep with an artificial pouch): or the housewarming of the apartment of his friend Natanson, where in a crazy atmosphere, he managed to intoxicate the artistic elite of Paris and launch the fashion of cocktail food. We owe the record of this cuisine (and also of a great body of the art collection itself) to Maurice Joyant. Joyant and Lautrec had been childhood friends, and their intimacy was renewed and deepened during the Montmartre years, when Lautrec's fame was growing and Joyant was director of the same art gallery in Paris that Theo Van Gogh had run before him. Lautrec was, throughout their relationship, the artist and innovator; Joyant, the steadying influence, the protector, and, after the painter's death, the executor. This book is a tribute to their friendship and to their daily intercourse in art and in cuisine. Thus, art, friendship, and food have come together in *The Art of Cuisine* as a joyful legacy of Henry de Toulouse-Lautrec and Maurice Joyant.

The diesel engine is by far the most popular powerplant for boats of all sizes, both power and sail. With the right care and maintenance it is twice as reliable as the petrol engine as it has no electrical ignition system, which in the marine environment can suffer from the effects of damp surroundings. Self-sufficiency at sea and the ability to solve minor engine problems without having to alert the lifeboat is an essential part of good seamanship. Marine Diesel Engines, explains through diagrams and stage-by-stage photographs everything a boat owner needs to know to keep their boat's engine in good order; how to rectify simple faults and how to save a great deal of money on annual service charges. Unlike a workshop manual that explains no more than how to perform certain tasks, this book offers a detailed, step-by-step guide to essential maintenance procedures whilst explaining exactly why each job is required.

The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and

decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

Though biblical scholars have searched for centuries, little is known about the childhood of Jesus. Fortunately, this incomplete picture gives Spencer Smith and Mark Penta ample room for their entertaining and highly imaginative cartoon book *Young Jesus Chronicles*. With a tongue-in-cheek premise that the book is the result of a recently unearthed account of Jesus's formative years as deciphered by Vatican-authorized experts (that is, cartoonists Smith and Penta), *Young Jesus Chronicles* is a clever and lighthearted collection of cartoons that celebrates the joy of puns and wordplay as much as it rewards you for paying attention in Sunday Bible school. We may never know the answer to the question, WWJD (What Would Jesus Draw)? But there's a chance (albeit very slim) the answer might be a cartoon memoir of His childhood similar to *Young Jesus Chronicles*.
