This new book is the first full account, inside or outside government, of China's efforts to acquire foreign technology. Based on primary sources and meticulously researched, the book lays bare China's efforts to prosper technologically through others' achievements. For decades, China has operated an elaborate system to spot foreign technologies, acquire them by all conceivable means, and convert them into weapons and competitive goods—without compensating the owners. The director of the US National Security Agency recently called it "the greatest transfer of wealth in history." Written by two of America's leading government analysts and an expert on Chinese cyber networks, this book describes these transfer processes comprehensively and in detail, providing the breadth and depth missing in other works. Drawing upon previously unexploited Chinese language sources, the authors begin by placing the new research within historical context, before examining the People's Republic of China's policy support for economic espionage, clandestine technology transfers, theft through cyberspace and its impact on the future of the US. This book will be of much interest to students of Chinese politics, Asian security studies, US defence, US foreign policy and IR in general.

For seventeen-year-old Lena, living in the trailer park with the rest of town's throwaways isn't exactly paradise. Dealing with a drunken father who can't keep his fists to himself doesn't help matters either. The only good thing in her life, other than track, is the mysterious man who visits her dreams, promising to find her. When a chair burns her arms, Lena chalks it up to stress-induced crazy. Yet as bizarre incidents escalate, even being crazy can't explain it all away... until one day dream guy does find her. Tarek lost Lena seventeen years ago after she was accused of treason and marked Tainted. He finally discovers her reborn on Earth into a life of suffering as punishment for her crime. However, someone else has already found her... and wants her dead. Willing to sacrifice everything, he fights to keep her safe so she can live the only life she's ever known—even if that life doesn't include him.

How can the United States avoid a future surprise attack on the scale of 9/11 or Pearl Harbor, in an era when such devastating attacks can come not only from nation states, but also from terrorist groups or cyber enemies? Intelligence and Surprise Attack examines why surprise attacks often succeed even though, in most cases, warnings had been available beforehand. Erik J. Dahl challenges the conventional wisdom about intelligence failure, which holds that attacks succeed because important warnings get lost amid noise or because intelligence officials lack the imagination and collaboration to "connect the dots" of available information. Comparing cases of intelligence failure with intelligence success, Dahl finds that the key to success is not more imagination or better analysis, but better acquisition of precise, tactical-level intelligence combined with the presence of decision makers who are willing to listen to and act on the warnings they receive from their intelligence staff. The book offers a new understanding of classic cases of conventional and terrorist attacks such as Pearl Harbor, the Battle of Midway, and the bombings of US embassies in Kenya and Tanzania. The book also presents a comprehensive analysis of the intelligence picture before the 9/11 attacks, making use of new information available since the publication of the 9/11 Commission Report and challenging some of that report's findings.

Auditory hallucinations rank amongst the most treatment resistant symptoms of schizophrenia, with command hallucinations being the most distressing, high risk and treatment resistant of all. This new work provides clinicians with a detailed guide, illustrating in depth the techniques and strategies developed for working with command hallucinations. Woven throughout with key cases and clinical examples, Cognitive Therapy for Command Hallucinations clearly demonstrates how these techniques can be applied in a clinical setting. Strategies and solutions for overcoming therapeutic obstacles are shown alongside treatment successes and failures to provide the reader with an accurate understanding of the complexities of cognitive therapy. This helpful and practical guide will be of interest to clinical and forensic psychologists, cognitive behavioural therapists, nurses and psychiatrists.

Match-fixing has become a widespread international problem in recent years. It includes everything from bribery of players, to putting undue influences on the owners of the soccer clubs, managers, coaches and others who have the ability to affect the final scores. In addition, match-fixing spills over into the arena of illegal betting (in person and online), which creates a host of additional organized crime opportunities, including human trafficking, prostitution, drugs, extortion and even terrorism. This timely volume brings together international contributions with an aim to increase awareness of the problems associated with match-fixing and the degree to which key agents in sport, particularly young people, are vulnerable. The contributions are based on INTERPOL's Global Experts Meeting in Singapore, in November 2012, which brought together key speakers to discuss issues surrounding match-fixing and how to combat corruption in football through channels of education. The purpose of this meeting was to identify ways that academia can play a role in developing and implementing training modules and academic courses, including certification procedures, to prevent match-fixing and develop lines of study at all educational levels. This unique work reflects the gravity of the situation around the world together with possible solutions.

"In his introduction to *The Life of Abraham Lincoln*, Henry Ketcham notes that there has been so much written about Lincoln that the legend has begun to obscure, if not to efface, the man. In this biography the single purpose has been to present the living man with such distinctness of outline that the reader may have a sort of feeling of being acquainted with him. Ketcham's clearly-written, unadorned account of Lincoln's life achieves its stated purpose, never removing its focus from the man who became the 16th President of the United States and led the nation through some of its most turbulent and difficult times."--Amazon.com

In a music world that was rougher than rough, where men took monikers of royalty and machismo like Duke and King and Lord; where boastful ringleaders fired guns into the air after descending a throne carried by their legions of followers, bandoliers crisscrossing their chests, ermine on their shoulders; where violent gangs stormed dances to "mash up," breaking sound system equipment and smashing bottles of beer on brick walls, how was a little girl with a sweet song in her soul to have a chance? Some Jamaican women found a way. They endured harassment and received little or no pay to perform as backup or alongside or in front of the male musicians. They sacrificed family and home for a life in the spotlight, or they brought their babies with them on the road. They took over the studio and made it their own, or they suffered unimaginable violence, even murder. They changed the course of music all over the world. These are the never-before-told stories of the women who tried and persevered and made it, no matter what their struggle. These are the *Songbirds: Pioneering Women of Jamaican Music*. Featuring exclusive photos and dozens of interviews from the women themselves, or those who knew them, Heather Augustyn, author of three previously-published books on Jamaican music history, brings to life the stories of these inspirational women so that their music can be savored and their lives finally celebrated.
